INOCULATION

Every pound or bushel or ton added to the yield helps the war effort.

Inoculated seed gives better yields, better quality on all legumes—Clovers, Beans, Peas. Cost per acre is very small.

Inoculated Soybeans yield 2 to 4 bushels more per acre, better quality. Widespread use of inoculation on Soybeans will increase the total yield millions of bushels—more oil, more meal.

Soybeans respond to inoculation even where planted on land previously used for Soybeans.
